

SECURITY GUARD

ARSLAN

SECURITY GUARD

At Arslan all of our guards (also known as Security Officers) are licensed by the SIA in the UK and local equivalents in other countries where present. We use dedicated security officers who can be available 24 hours a day. We can provide a range of services from static guards and guard dogs to emergency response and mobile security.

Our guards will enforce laws on the property if required, deter criminal activity and address any other problems that might arise. Our guards write comprehensive reports outlining their observations and activities during their assigned shifts. Where possible we use digital systems to provide proof of presence and to streamline any administration.

Mobile security teams can be very useful for checking large areas when fixed observation posts cannot cover the same distances. We use RFID location tags as well as GPS data to track and record patrols for accountability.

Our guards will patrol and inspect property to protect against fire, theft, vandalism, terrorism and any illegal activity.

OUR BENEFITS

- Reception, concierge and commissionaire duties
- Gatehouse and night watchman duties
- Private security services for office premises
- Private security for retail stores
- Security teams including dog patrols for building sites and refurbishments
- Alarm monitoring and emergency response services
